Insights of WeRatedogs Tweets

By Junth Basnet

Introduction

The dataset used in this project is the tweet archive of user @dog_rates, known as **WeRateDogs** that rates dog's with a humorous comment. In general ratings are from 1 to 10, but they thinks that every dog deserves at least 10 so their numerators are always greater than 10 with a denominator of 10.(12/10 , 14/10)

WeRateDogs has over 6 million followers and has received international media coverage.

So, we will discuss some insights based on the data used for this project.

For eg, which dog breed is the most common in our dataset? Etc.

Most common dog type

The most rated dog was golden retriever with 150+ ratings.
